ONCOLOGY

Webinar Series

**YOU ARE INVITED
TO AN EXCLUSIVE
VIRTUAL EVENT**

**15 June
2021**

From 3:00 to 5:00 pm CEST

GENERAL INFORMATION

During this exclusive virtual event, participants will learn to leverage nutritional strategies to help improve outcomes in cancer patients. iCAN Oncology is dedicated to improving patient care through advancing parental nutrition education around the world.

AIM

The Oncology International Conference for Advancing Nutrition (iCAN) is a global education program designed specifically for Oncologists to gain valuable information on how nutrition therapy impacts their patient outcomes. The program curriculum was developed by a diverse panel of renowned International physicians with specific expertise in nutrition strategies related to Oncology. There is no cost to attend and participating Health Care Professionals (HCPs) will leave the program with a greater scientific and clinical understanding of oncology tailored nutrition applications to help improve their patient's well-being.

LECTURES

The virtual iCAN will have a theoretical module with the following topics covered:

- Clinical nutrition (CN) as key part of oncology therapy
- The evidences of CN, what we have and what we still need
- CN in cancer patients, no reason for delay
- Home Parenteral Nutrition, the evidences in cancer patients
- Debate on clinical cases

WORKSHOPS

An Interactive webinar dedicated to clinical case discussions and open Q&A will be the practical module customized for oncologists.

PRESENTERS

International, Regional and Local Experts

The iCAN Oncology program was developed by renowned International Faculty. These faculty members convened at the iCAN Oncology Faculty Advisory Board to share their nutrition expertise and disease-state knowledge to develop the content, case-studies and workshops being presented during the iCAN Oncology program.

Presenters for this iCAN Oncology program include:
